

Delta 4 Beam

The TÜV-tested and flexible d-flex safety barrier „Delta“ is an innovative and economic separation of pedestrian areas and trails.

Additionally to the 3 beams Delta safety barrier we now offer you two variants of the Delta barrier with four beams in height 1200 mm and 1600 mm. The Delta barrier in 1200 mm height with four beams offers a protection with a difference of only 329 mm to the ground for more protection

Due to the modular system a customized solution can always be supplied by means of individual cuttings.

The mounting material is always included in the scope of delivery of the d-flex Safety Barrier Delta. The fischer ULTRACUT FBS II is the perfect powerful concrete screw for top installation comfort.

FACTS

ART. NO	COMPONENTS
12000018	Delta Bollard
12000019	Delta End post
12000020	Delta Cross post
