

Delta column

The column protector „Delta“ consists of four corner posts of the Delta safety barrier, which are connected with the associated spar sets to a square.

The height of the column protection amounts to 1200 mm, the spar sets can be ordered in lengths of 705 mm and 1510 mm. Of course, the column protection Delta also offers the possibility of ordering individual lengths between 350 mm and 1510 mm.
