

# Juliet

The swing door Juliet is an extension of the safety barriers Delta. It can also be integrated in the traffic barrier PLUS Echo.

Our swing door Juliet is also available with a wheel. The d-flex swing door element Juliet is made of special flexible material. The swing door opens up to 180°, and returns automatically to its original state (closed) with hydraulic hinges.

It can be obtained in six different passage widths (800 mm, 1000 mm, 1200 mm and 1500 mm, 1750 mm, 2000 mm with rollers). In addition, individual dimensions are offered.

The fixing material is always included in the delivery.
