

# POWER DOOR

With the Troax Power door, you will get a motor solution that easily can be added on to a linear door or single sliding door in aluminium rail. When installed, the automated door can be operated in various ways thanks to multiple opening and closing possibilities. Open and close manually with buttons or signal from PLC or operate the door from a forklift using a sensor. Comprehensive documentation for easy CE marking of the sliding door on site is included. The complete add-on package contains an electric drive, a control box, tooth racks, as well as all necessary fasteners.

# VARIANTS

Art. Nr	Components
89110001	Power door single rail MG
89110002	Toothrack single rail 300mm, with holder
89110013	Power door single rail PLC
89110014	Power door linear PLC

Art. Nr	Components
89110020	Power door control box PLC 24V
