SAFE LOCK

- → Anti-tamper features with maintenance lockout capability
- → Impact tested to 1,600 joules
- → Locking solution that seamlessly integrates safety switches

The Safe Lock is Troax own designed lock that is fitted with two bolts directly on the panels which makes it fast and easy to install. It's equipped with the chosen safety switch actuator and fixings for the safety switch included. The door is held closed with a strong metal bolt and the Safe Lock is impact tested withstand an impact of 1,600 joules. The escape release handle is designed to fit between the mesh apertures avoiding the need to cut any wires. A blind rivet can be added to fix the lock to the door blade to prevent tampering. When the door is in an open position, a padlock can be fixed to secure the lock and prevent the door from being closed during maintenance.
