

Panels

The Decofor system is a complete decorative fencing system developed for design oriented and rigid fencing solutions.

Decofor®

BENEFITS

Decorative

Decofor is a professional fence with a unique contemporary design. The panels are robust and yet extremely elegant and decorative. The panels, posts and gates are perfectly harmonised.

High longevity

The coating technology of Betafence is state of the art and guarantees a high longevity. After galvanising an adhesion coating is applied for a perfect bond with the final polyester coating.

Easy installation

The system is very easy to install. All elements are precisely integrated. The Decofor system allows installation between and on walls.

Complete system

There are 3 types of Decofor: Arco (curved panels), Recto (flat panels) and Wave (curved panels). They all exist in different heights, with assorted posts, swing gates (single or double) and installation accessories. All of one uniform design.

Applications

- Residential buildings
- Parks
- Schools
- Public buildings
- Swimming pools
- Pedestrian fence

Panels

The panels are out of heavy welded fence, 2015 mm wide and available in 4 heights. The mesh size is 200 x 65 mm. The wires are very strong: horizontal double wires 8 mm and vertical 6 mm.

Gates

The Decofor system is totally finished and safely equipped with single and double Decofor gates.

Coating technique

Panels, posts and gates are first galvanised. Afterwards an adhesion coating is applied for perfect bond with the final polyester coating. The minimum coat is 100 µ (panels) and 60 µ (posts and gates).

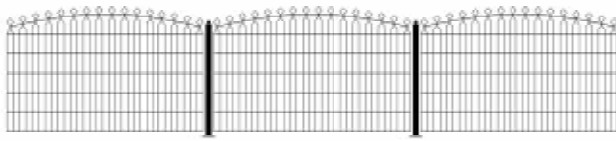

Colours (p 116)

Green (RAL 6005), white (RAL 9010) and black (RAL 9005). In total Betafence offers 7 Classic colours and 3 Prestige colours (metallic or structural coatings). More and other colours out of our RAL collection are available on request.

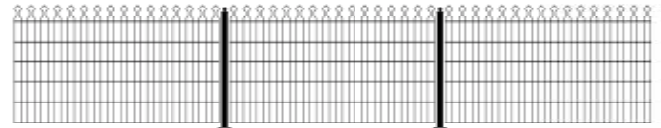

Post and fixing systems

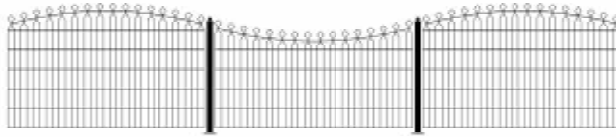

The posts are welded square tubular posts with profile of 60 x 60 x 1,50 mm. For a decorative design the posts are supplied with a metal cap with ball. Fixation of the panels to the posts by means of metal fixing collars (galvanised and plastic coated) and with security bolts M8 out of stainless steel with self breaking nut.
