Anti-Collapse System for palletracking

The Anti collapse system prevents any risk of overloading in high stacking situations. A very flexible system that is vital for secure stacking and loading in all kinds of pallet racks, from the smallest application up to very big automated warehouse.

Uni-Bracket and Ultima bracket comes in many different levels of stand-off to palletrack, from 0 up to 400 mm.

Panels availble are UR 300, UR 325 and UR 350
