

SECURE YOUR SERVER ROOM.

Our modular panel systems – with or without mesh ceilings – can be adapted to fit any height. The mesh panels allow proper air circulation and can be built around existing installations and obstacles. Our offer includes complete installations with mesh or steel sheet panels. The latter are primarily used to protect an area from view. There are several solutions to provide a proper floor environment for computers and servers, as well as solutions to protect the area above a suspended ceiling.

A COST-EFFECTIVE AND FLEXIBLE SOLUTION. ADAPTABLE TO FIT ANY HEIGHT. CAN BE COMBINED WITH OUR MESH CEILINGS. ALLOWS PROPER AIR CIRCULATION, LIGHT AND SPRINKLER PENETRATION.

An example of mesh infill between the building floor and the computer floor.
